

# Invitation to Freemelt's investor meeting

---

Freemelt invites investors and stakeholders to a digital investor meeting on October 1, 2025, at 3 PM CEST. During the meeting, CEO Daniel Gidlund and CFO Martin Granlund will provide an update on market outlook and current trends in the company's key focus areas, defense, MedTech, and energy, with a particular focus on fusion energy and the new collaboration with Jiuli in China.

Date: 1 October 2025

Time: 3 PM CEST

Registration and event link: <https://www.finwire.tv/webcast/freemelt/update/>

Questions can be submitted via the registration link before or during the event.

## About Us

Freemelt develops advanced 3D printers for metal components and aims to become the leading supplier in additive manufacturing (AM) using E-PBF technology, targeting SEK 1 billion in revenue by 2030. The solutions primarily support companies in the defense, energy, and medical technology sectors in Europe and the USA, enabling them to drive innovation and improve production efficiency. Founded in 2017, Freemelt has expanded its product portfolio to include three printer models, with two designed for industrial production and one (Freemelt ONE) targeting research institutes and universities. The modular industrial printers (eMELT) leverage E-PBF technology, delivering significantly higher efficiency compared to other machines on the market while maintaining flexibility in metal selection.

Freemelt generates revenue primarily through the sale of advanced 3D printers at fixed prices, complemented by support and maintenance services, which are expected to account for 25% of total revenue by 2030.

The company is now focused on further industrializing its product and service portfolio and driving commercialization in the European and North American markets. Read more at [www.freemelt.com](http://www.freemelt.com)
