

Ekobot AB begins cooperation with the estimation service Pin-point

Agtechbolaget Ekobot is starting a collaboration with the estimation platform Pinpoint Estimates to capture the broader market expectations. Pinpoint is an open platform that compiles market expectations for listed companies' full-year and interim reports.

- Ekobot was listed on March 15 this year and we are on a strong growth journey. As a newly listed company, transparency and communication are of course important, something we take very seriously and together with Pinpoint we now take the next step when we add insights about the broad target-interested target group in other ways than just through share price reactions, says Erik Jonuks, CEO of Ekobot.

Through Pinpoint, Ekobot can continuously obtain compilations of broader market expectations and thereby gain insights into how the general public receives and perceives events around the company. The collaboration begins immediately, which means that anyone can now, through a few very simple steps, contribute with their expectations for Ekobot's upcoming reports from today.

By providing estimates, average expectations are created, a weighted average value (consensus estimate) is produced using algorithms, and a reference point is made available to anyone who wants to take part in it. The company now urges all its shareholders and stakeholders to contribute with their expectations before the reports in order to create increased transparency both for the company and other people.

- We look forward to contributing to a two-way communication between Ekobot and the general public to create a clear picture of expectations and increased insights into how information is received and interpreted, says Robin Berglund, CRO at Pinpoint.

About Pinpoint

Pinpoint, pinpointestimates.com, is an open platform for estimating listed companies. Pinpoint compiles the entire market's expectations for listed companies' full-year and quarterly reports. The platform is free and open to anyone who wants to use it. Pinpoint creates average expectations for each listed company, ie also for the many companies that today lack analytical monitoring - it is a win-win for investors, listed companies and the market in general.

About Ekobot

Ekobot AB (publ), based in Västerås, conducts business based on the business concept of developing, manufacturing and selling autonomous agricultural robots that enable efficient precision cultivation where weed management takes place completely without or with minimal use of herbicides. The company's vision is to provide the agricultural sector with a long-term sustainable alternative for reducing or completely eliminating chemical spraying in crops of crops for human consumption.

The company is listed on the Nasdaq First North Growth Market.

About Ekobot

Ekobot is the result of the founder Ulf Nordbeck's thoughts and desire to combine robotics and healthy sustainable food production. Ekobot's goal is to be able to offer practical and sustainable solutions to agricultural issues while reducing workload with autonomous tools for vegetable farmers. Ekobot has grown and combined today a team of experts in agricultural robotics with shareholders who share their convictions and understand the challenges of start-ups.
