AcouSort signs a collaboration agreement with Italian IVD manufacturer Edif

AcouSort AB today announced that it has signed a Letter of Intent with Italian IVD manufacturer Edif to initiate a collaboration exploring new business and development opportunities between the companies. The collaboration will begin with a six-month feasibility phase and represents a first step in evaluating a potential business partnership.

The collaboration will initially focus on a feasibility phase expected to run for approximately six months. The project represents a first step in exploring the potential for a broader collaboration between AcouSort and Edif. The collaboration reflects AcouSort's continued focus on establishing partnerships that can create new opportunities for the company's technology and support its long-term commercial ambitions.

"We are very pleased to initiate this collaboration with Edif. The project is well aligned with our strategy of developing AcouSort through partnerships with innovative companies in the life science sector. We see good potential in working together and exploring new opportunities. This first phase will allow us to evaluate the collaboration and establish the basis for further development," says Dr. Torsten Freltoft, CEO of AcouSort.

"At Edif, we see a significant potential in this collaboration with AcouSort. Their acoustofluidics technology fits well with our experience in developing, producing and commercializing laboratory analyzers, and we see interesting opportunities in combining the two. This first phase will allow us to evaluate the technology together and to define the next steps," says Giorgio Duimich, General Manager of EDIF Instruments.

ABOUT EDIF INSTRUMENTS

EDIF Instruments S.r.l. is an Italian manufacturer of in vitro diagnostic (IVD) instruments based in Rome, with nearly four decades of experience in the field. Since 1993 the company has designed and produced fully automated analyzers for clinical chemistry and turbidimetry testing. A significant part of EDIF's business is OEM development and manufacturing. EDIF designs and builds analyzers for international diagnostic companies, which market them under their own brands. All EDIF products are designed and manufactured in Italy in compliance with the EU In Vitro Diagnostic Regulation (IVDR).

ABOUT ACOUSORT

AcouSort AB (corporate registration number 556824-1037) is an innovative technology company focusing on developing products and solutions for integrated preparation of biological samples. With the help of sound waves, the company's products can separate blood cells, concentrate, purify, and stain cells, exosomes, and bacteria from biological samples. The technology of the company's products is acoustofluidics, where sound waves and microfluidics enable automated handling of samples in a range of application areas, from research on new biomarkers to the development of new diagnostic systems for near-patient testing – so-called Point-of Care (POC) systems. The company's commercialization strategy is based on the already proven business model of providing separation modules to diagnostic system manufacturers for integrated sample preparation as well as to continue the commercialization of the company's research instruments. With the help of the company's products and development of point-of-care tests, new diagnostic systems and treatments are enabled, addressing some of the most challenging disease areas of our time: cancer, infectious diseases, and cardiovascular diseases. AcouSort is listed at Nasdaq First North Growth Market. The company's Certified Adviser is Tapper Partners AB.
