Customer story – Winext technology uses radar for improved accuracy in their parking detection module

Chinese company Winext Technology combines Acconeer's A1 radar sensor with a geomagnetic sensor for improved accuracy in their parking space detection module. Thanks to the good result, the company plans to use the A1 radar sensor in more products such as smart trash cans and liquid level meters. Read the full customer story to learn more.

Winext Technology is an Artificial Intelligence of Things (AIoT) "end-to-end" one-stop solution provider. Artificial Intelligence of Things (AIoT) combines Artificial intelligence (AI) technologies with the Internet of things (IoT) infrastructure for more efficient IoT operations, improved human-machine interactions and enhanced data management and analytics.

About Acconeer AB
Acconeer is a leading radar sensor company based in Lund, south Sweden, in Ideon, the country's hottest region for wireless technologies. Acconeer is developing a truly leading ultra-low power, high precision 3D sensor which will revolutionize the way that mobile devices interpret their surroundings. Acconeers ultra-low power and millimeter precision sensor will be a robust and cost-effective solution for applications ranging from virtual reality and gaming to security and robot control. Information from the sensor can also be used to identify different materials, these are just some examples of the wide range of possibilities of application areas for the sensor. Acconeer is listed on Nasdaq First North Growth Market with the ticker code ACCON, Redeye is the company's Certified Advisor (CA) and can be reached via telephone +46 (0)8 121 576 90 or via mail certifiedadviser@redeye.se.
