

Press release 2022-10-05

Acconeer has delivered more than 100 000 radar modules

Acconeer has now shipped more than 100 000 modules with the A111 radar sensor since the company launched its first module in December 2018. Since then, the company has released a range of popular modules where a radar sensor is combined with a microprocessor (MCU) and other supporting components.

Mikael Rosenhed, Head of Product Management Acconeer, comments: "We made the decision to develop our first module as a reference design to make it easier for customers to evaluate our radar sensor and develop their products using it. Over time, our module range has been expanded to also include integration-ready modules for customers to incorporate in their mass-produced solutions. These have been highly popular and we are happy to see that we have now sold more than 100K modules in less than four years."

About Acconeer AB

With ground-breaking technology, Acconeer has developed a radar sensor that opens a new world of interaction. Acconeer Micro Radar Sensor, with low power consumption, high precision, small size and high robustness, is a 60GHz robust and cost-effective sensor for detection, distance measurement, motion detection and camera-supported applications with low power consumption. Acconeer combines the advantage of low power consumption with highly accurate pulsed radar systems of coherent radar, all integrated into a component with a surface area of only 28 mm². The radar sensor can be included in a range of mobile consumer products, from smartphones to wearables, but also in areas such as robots, drones, the Internet of Things, healthcare, automotive, industrial robots and security and monitoring systems. Acconeer is a semiconductor company and, as a business model, sells hardware to manufacturers of consumer electronics products. Acconeer is listed on Nasdaq First North Growth Market with the ticker code ACCON, Redeye is the company's Certified Advisor (CA). For more information: www.acconeer.com.
