

TEKNA HOLDING ASA: Tekna secures CAD \$2.0 million in plasma systems orders

7.8.2024 10:00:00 CEST | Tekna Holding ASA | Non-regulatory press releases

ARENDALE, NO / SHERBROOKE, QC. 7 August 2024 - Tekna (OSE: TEKNA), a world-leading provider of advanced materials solutions to industry, has secured two orders for plasma systems, with a combined value of CAD 2.0 million.

Tekna's plasma systems are acclaimed for their state-of-the-art research capabilities in advanced materials, offering various configurations to meet the needs of diverse industries and academic research sectors.

"We reaffirm our standing as the leading provider of advanced plasma systems to industry and academia. Our sophisticated systems product line provides a strong foundation for Tekna, while we continue to expand our own production of advanced materials," says Luc Dionne, CEO of Tekna.

The two orders are for TEK40 plasma systems to be delivered over the next 12 months. They will be used in research and development of materials other than those found in the industries where Tekna is active. The two orders have been booked as order intake in the third quarter of 2024. Including these orders, Tekna now has a CAD 6.2 million back log for systems.

Tekna will publish its second quarter and half-year results on 16 August.

About Tekna Holding ASA

Tekna is a world-leading provider of advanced materials to industry, headquartered in Sherbrooke, Canada.

Tekna produces high-purity metal powders for applications such as 3D printing in the aerospace, medical and automotive sectors, as well as optimized induction plasma systems for industrial research and production. With its unique, IP-protected plasma technology, the company is well positioned in the growing market for advanced nanomaterials within the electronics and batteries industries.

Building on 30 years of delivering excellence, Tekna is a global player recognized for its quality products and its commitment to its large base of multinational blue-chip customers. Tekna's powder products increase productivity and enable more efficient use of materials, thereby paving the way towards a more resilient supply chain and circular economy.
