## Definition

Revenue, order intake and order backlog from work related to renewables and transitional energy solutions. This mainly includes projects with solutions and technologies for offshore wind, hydropower, aquaculture, carbon capture and storage (CCS), hydrogen, electrification of offshore and onshore facilities, and decommissioning & recycling.

These figures are compiled from a bottom-up approach of projects and work in Aker Solutions for the relevant periods. The figures are unaudited and subject to change.

# Alternative Performance Measures

## Basis for Preparation

This presentation provides financial highlights for the quarter for Aker Solutions, a Norwegian limited company listed on the Oslo Stock Exchange.

The same measurement principles as presented in the Annual Report 2023 have been used when preparing this report. The report does not meet all disclosure requirements in IAS 34 (Interim Financial Reporting) and the figures are not audited.

## Alternative Performance Measures

Aker Solutions discloses alternative performance measures in addition to those normally required by IFRS as such performance measures are frequently used by securities analysts, investors and other interested parties.

Alternative performance measures are meant to provide an enhanced insight into the operations, financing and future prospects of the company.

# Alternative Performance Measures

## Profit Measures

EBITDA and EBIT terms are presented as they are used by financial analysts and investors. Special items are excluded from EBITDA and EBIT as alternative measures to provide enhanced insight into the financial development of the business operations and to improve comparability between different periods.

**EBITDA** is short for earnings before interest, taxes, depreciation and amortization. EBITDA corresponds to the “operating income before depreciation, amortization and impairment” in the consolidated income statement in the annual report.

**EBIT** is short for earnings before interest and taxes. EBIT corresponds to “operating income” in the consolidated income statement in the annual report.

**Margins** such as EBITDA margin and EBIT margin are used to compare relative profit between periods. EBITDA margin and EBIT margin are calculated as EBITDA and EBIT divided by revenue.

**Special items** may not be indicative of the ongoing operating result of cash flows of the company. Profit measures excluding special items are presented as alternative measures to improve comparability of the underlying business performance between the periods.

## Financing Measures

Alternative financing and equity measures are presented as they are indicators of the company's ability to obtain financing and service its debts.

**Liquidity buffer** (available liquidity) is a measure of available cash and is calculated by adding together the cash and cash equivalents and the unused credit facility.

NOK million	3Q 2024	3Q 2023
Cash and cash equivalents	4,472	7,272
Credit facility (unused)	3,000	3,000
<b>Liquidity buffer</b>	<b>7,472</b>	<b>10,272</b>

**Net Current Operating Assets (NCOA) or Working Capital** is a measure of the current capital necessary to maintain operations. Working capital includes trade receivables, trade payables, accruals, provisions and current tax assets and liabilities.

NOK million	3Q 2024	3Q 2023
Current tax assets	76	68
Inventory	44	49

Customer contract liabilities	(5,419)	(3,873)
<b>Net current operating assets (NCOA)</b>	<b>(7,655)</b>	<b>(6,631)</b>

**Net interest-bearing debt to EBITDA (leverage ratio)** is a key financial measure that is used by management to assess the borrowing capacity of a company. The ratio shows how many years it would take for a company to pay back its debt if net debt and EBITDA are held constant. The ratio is one of the debt covenants of the company.

The ratio is calculated as net interest-bearing debt (total principal debt outstanding less unrestricted cash) divided by EBITDA. If a company has more cash than debt, the ratio can be negative. The leverage ratio for Aker Solutions does not include the effects of IFRS 16 Leasing, as the debt covenants are based on frozen GAAP.

Further, the EBITDA is calculated based on the last four quarter period and it excludes certain special items as defined in the loan agreements, such as restructuring of offices (onerous leases) and other restructuring costs.

# Alternative Performance Measures

## Order Intake Measures

Order intake, order backlog and book-to-bill ratios are presented as alternative performance measures, as they are indicators of the company's revenues and operations in the future.

**Order intake** includes new agreed customer contracts in the period in addition to expansion of existing contracts. For construction contracts, the order intake includes the value of agreed contracts and options, and value of agreed change orders and options. It does not include potential options and change orders. For service contracts, the order intake is based on estimated customer revenue in periods that are firm in the contracts.

**Order backlog** represents the estimated value of remaining work on agreed customer contracts. The order backlog does not include parts of the services contracts, which is short-cycled or book-and-turn in nature. The order backlog does also not include potential growth or value of options in existing contracts.

**Book-to-bill ratio** is calculated as order intake divided by revenue in the period. A book-to-bill ratio higher than 1 means that the company has secured more contracts in the period than what has been executed in the same period.

## Disclaimer

This Presentation includes and is based, inter alia, on forward-looking information and statements that are subject to risks and uncertainties that could cause actual results to differ. These statements and this Presentation are based on current expectations, estimates and projections about global economic conditions, the economic conditions of the regions and industries that are major markets for Aker Solutions ASA and Aker Solutions ASA's (including subsidiaries and affiliates) lines of business. These expectations, estimates and projections are generally identifiable by statements containing words such as "expects", "believes", "estimates" or similar expressions. Important factors that could cause actual results to differ materially from those expectations include, among others, economic and market conditions in the geographic areas and industries that are or will be major markets for Aker Solutions' businesses, oil prices, market acceptance of new products and services, changes in governmental regulations, interest rates, fluctuations in currency exchange rates and such other factors as may be discussed from time to time in the Presentation. Although Aker Solutions ASA believes that its expectations and the Presentation are based upon reasonable assumptions, it can give no assurance that those expectations will be achieved or that the actual results will be as set out in the Presentation. Aker Solutions ASA is making no representation or warranty, expressed or implied, as to the accuracy, reliability or completeness of the Presentation, and neither Aker Solutions ASA nor any of its directors, officers or employees will have any liability to you or any other persons resulting from your use.

Aker Solutions consists of many legally independent entities, constituting their own separate identities. Aker Solutions is used as the common brand or trade mark for most of these entities. In this presentation we may sometimes use "Aker Solutions", "we" or "us" when we refer to Aker Solutions companies in general or where no useful purpose is served by identifying any particular Aker Solutions company.
