

Hammertech AS Secures Key Order for 10 AquaField Meters with Accuflow (US), Driving Multiphase Measurement Automation

Bergen, Norway - Hammertech AS, a subsidiary of Nordic Technology Group AS (NTG), is proud to announce a new collaboration with Accuflow (US), a leader in advanced separation technologies. Accuflow has placed an initial order for 10 AquaField multiphase meters, with the first unit scheduled for delivery in early February. This partnership represents a significant milestone in advancing automation and digitalization in multiphase flow measurement.

The AquaField multiphase meter is designed to deliver accurate, real-time measurements of oil, gas, and water flows, enabling operators to optimize production and enhance operational efficiency. By integrating AquaField meters into its portfolio, Accuflow is enhancing its offerings with innovative technology that aligns with its mission of providing advanced solutions to the oil and gas industry.

Accuflow, with decades of expertise in separation technology, is known for delivering reliable and efficient solutions that meet the complex challenges of oil and gas production. The partnership with Hammertech marks a significant step in Accuflow's journey toward automation and digital transformation in multiphase measurements, helping operators streamline operations and maximize resource utilization.

Jacob Abel, P.E., General Manager of Accuflow, expresses enthusiasm for the partnership:

“We are excited to take this next step in Accuflow's journey by integrating Hammertech's AquaField meters into our portfolio. This collaboration represents a convergence of our longstanding expertise in separation technology with cutting-edge multiphase measurement innovation. By embracing these advanced solutions, we are empowering our customers to achieve greater efficiency, precision, and sustainability in their operations.”

This initial order of AquaField meters underscores the growing demand for non-radioactive, robust, and cost-effective solutions in multiphase flow measurement. Hammertech and Accuflow are committed to delivering technologies that drive progress and create value in the energy sector.

Kaare Lunde, CEO of Hammertech AS, highlights the importance of this collaboration:

“Partnering with Accuflow is a tremendous opportunity for Hammertech. Accuflow's reputation for excellence in separation technology and their commitment to innovation align perfectly with our vision for the AquaField product line. Together, we are advancing automation and efficiency in multiphase flow measurement, addressing critical industry challenges with reliable and sustainable solutions.”

About Hammertech AS: Hammertech AS, a subsidiary of Nordic Technology Group AS (NTG), is a Norwegian technology company specializing in multiphase flow metering solutions. With a focus on innovation, Hammertech's AquaField product line delivers accurate, real-time measurements that optimize production and enhance operational efficiency in the oil and gas industry. For more information about AquaField multiphase

meters and Hammertech's advanced flow measurement solutions, please visit www.hammertech.no.

About Accuflow: Accuflow is a leading provider of advanced separation technology solutions, offering decades of experience in designing and implementing reliable and efficient systems for the oil and gas industry. Committed to innovation and customer success, Accuflow helps operators overcome complex production challenges with cutting-edge technologies. For more information, visit www.accuflow.com.
