

## **Kongsberg Automotive wins a new contract worth approximately EUR 20 million in estimated lifetime revenue in fast-growing EV segment**

**Kongsberg, May 7, 2025:** Kongsberg Automotive (KA) has won a new four-year contract worth approximately EUR 20 million in estimated lifetime revenue for its Dog Clutch Actuator (DCA).

The DCA, developed by KA, is designed for gear-shifting and decoupling applications for multi-speed transmissions, either electric axle or central drive for hybrid, battery electric, and fuel cell vehicle applications, ranging from passenger cars to heavy-duty commercial vehicles.

KA's Wuxi facility will manufacture and supply the product to a leading global Original Equipment Manufacturer (OEM) in the electric commercial vehicle segment.

“KA's DCA is the future of gear-shifting—energy-efficient, sustainable, easy-to-maintain, and compactly designed for a broad range of EVs, from light- to heavy-duty,” says David Redfearn, KA's Chief Sales Officer. “We're proud to win this contract and grow our footprint in China's fast-growing EV market with products that deliver lasting value and real technical advantages.”
