

Napatech and Broadcom Symantec Forge Unparalleled Cybersecurity Solution For Data Loss Prevention

COPENHAGEN, Denmark – May 21, 2025 – Napatech™ (OSLO: NAPA.OL), a leading provider of Programmable Network Interface Cards (NICs) used in data centers, announced a groundbreaking solution with Symantec, a division of Broadcom that is a global leader in cybersecurity protection. The new design elevates Data Loss Prevention (DLP) to unprecedented levels in enterprise and cloud data center networks.

In an era where data breaches and cyberattacks are costly while rising at an alarming rate, this powerful solution offers businesses a resilient safeguard. The solution integrates Napatech's state-of-the-art programmable NICs into Symantec's advanced Data Loss Prevention (DLP) platform. This fusion delivers unmatched agility and performance, ensuring that businesses worldwide can identify, address, and mitigate risks with unprecedented accuracy and speed to ensure data security and compliance.

"As network traffic volumes surge, maintaining optimal performance becomes increasingly complex," said Tobias Pischl, Head of Product Management, Information Security at Broadcom Symantec. "Integrating Napatech's programmable NICs accelerates Symantec's DLP capabilities, enabling higher speed processing that ensures that users can effectively monitor and protect their data without compromising performance."

"This innovative solution is poised to empower businesses with robust defenses, greater insight, and faster recovery, ensuring the integrity of critical data remains uncompromised," said Jarrod Siket, Chief Product and Marketing Officer at Napatech. "Combining Symantec's comprehensive cybersecurity solution with Napatech's programmable NICs marks a significant leap in the fight against data loss and security breaches."

About Napatech

Napatech is the leading supplier of programmable NICs, including SmartNICs and IPU, used in cloud, enterprise, and telecom data centers. Through commercial-grade software suites integrated with high-performance hardware, Napatech accelerates network infrastructure, security, and storage workloads to deliver best-in-class system-level performance while maximizing the availability of server compute resources for applications, services, and revenue. Additional information is available at www.napatech.com.

No Forward-Looking Statements

This press release may contain forward-looking statements which are only predictions and may differ materially from actual future events or results due to a variety of factors, including but not limited to, business conditions, trends in the industry and markets, global economic and geopolitical conditions, macro-economic factors, and other risks and uncertainties set forth in Napatech's reports. The matter discussed in this release is based on current expectations and is subject to change. Napatech will not necessarily update this information. For details, visit us at www.napatech.com.
