

Hammertech AS Achieves 9COM Qualification and Approved Vendor Status with Saudi Aramco

Bergen, Norway – Hammertech AS, a subsidiary of Nordic Technology Group AS (NTG), is very pleased to announce that Hammertech AquaField multiphase meters have successfully achieved 9COM certification and registration with Saudi Aramco, one of the world's leading integrated energy and chemicals companies.

This significant milestone is the culmination of an extensive qualification process, including successful completion of:

- **Technical approval** - Blind testing overseen by DNV in the Netherlands, confirming the performance and reliability of AquaField Green.
- **Operational approval** - Field trials in Saudi Arabia, validating the technology under real-world operating conditions.
- **Audit approval** - A comprehensive audit and evaluation to be an approved vendor, conducted by Aramco Offshore Company (AOC).

The 9COM certification grants Hammertech's AquaField Green multiphase meters formal approval for procurement across Saudi Aramco's businesses, paving the way for large-scale deployment to support Aramco's digitalization initiatives, including well-level real-time measurements and production optimization.

Kaare Lunde, CEO of Hammertech AS, expressed his enthusiasm:

“Achieving Saudi Aramco 9COM certification and registration marks a major milestone for Hammertech. This qualification highlights our commitment to pioneering solutions that advance digitalization and performance across the energy industry. We are especially grateful to the broader Saudi Aramco team for their thorough and professional qualification process. This milestone enables Hammertech to support Aramco's ambitious digitalization initiatives and positions us for significant growth across one of the world's largest and most forward-looking energy companies.”

Imed Benlizidia, Petroleum Engineering Specialist in the Production & Facilities Development Department at Saudi Aramco, commented:

“We are pleased to see Hammertech's AquaField multiphase water cut meters achieve 9COM registration following a thorough qualification process. The proven accuracy, robustness, and scalability of the AquaField Green technology align well with Saudi Aramco's vision for digitalization and operational excellence. We look forward to seeing this solution contribute to the efficiency and reliability of our field operations.”

The AquaField Green multiphase meters are designed to deliver accurate, real-time measurements of oil, water, and gas flows, enabling optimized production monitoring, enhanced operational efficiency, and digital transformation of oilfield management.

About Hammertech AS

Hammertech AS, a subsidiary of Nordic Technology Group AS (NTG), specializes in advanced multiphase flow metering solutions. With a focus on delivering accurate, real-time measurements, Hammertech's AquaField product line enhances operational efficiency and optimizes production in the oil and gas industry.
