The vesting periods of the current program end in the period between 20 January 2023 and 30 January 2024. At initial recognition, the fair value of the options, as estimated by the Black-Scholes model, are straight-lined through the vesting period as administration expenses with corresponding entry against other paid in equity. Since the options are equity settled, no subsequent measurement is required under IFRS.

The Company's Board of Directors has resolved to cash settle the exercised share options and the Company paid an amount to the employee equal to the difference between the exercise price of NOK 1.05 per share and the closing share price of the Company on the 17th of January 2025 of NOK 1.71 a total of USD 701 thousand.
