Nocom and IKEA extend collaboration

Nocom provides server access solution for IKEA's worldwide standard platform

Nocom AB (publ) has signed an agreement with IKEA for the provision of server access products and services for IKEA's standard platform. The agreement also covers maintenance and support and applies to use in the IKEA organization globally. The products in question are WRQ's Reflection series and the agreement is worth around SEK 3 million for Nocom.

"This agreement is yet another step in our effort to standardize and enhance the efficiency of our global IT infrastructure. We have chosen to act now, ensuring our users can access the business systems with security and stability," says Tord Åkesson, Managing Director of IKEA Information Services AB.

"Furthermore, it gives us the flexibility we need to proceed with new technology and secure support for an expanding IKEA. Choosing Nocom is a natural extension of our long-term collaboration. We are also looking into the possibility of extending our collaboration even further in the development of our global IT infrastructure," concludes Tord Åkesson.

"We are naturally delighted about the confidence IKEA is showing Nocom in choosing us as its supplier," says Tomas Nygren, CEO of Nocom.

"We look forward to being part of the global initiatives of such a well-established brand. There is plenty of scope for Nocom to extend its undertakings in this context."
