Nocom Broadens Collaboration with Föreningssparbanken

Nocom AB (publ) has signed a contract for content management with Föreningssparbanken AB (publ), one of the largest bank groups in the Nordic region. The contract represents a continuation of earlier collaboration between the companies and encompasses system development and system architecture as well as consulting services pertaining both to content management and personalized Web pages for individual users.

Nocom has already helped with technological development of Föreningssparbanken's system for content management, providing both products from the American software vendor Vignette and services. Nocom employs some of the country's leading content management consultants, with extensive experience of larger portal projects.

"We will be creating the required structure for easy personalization and the distribution of information. A good content management system simplifies the distribution of information via the various channels currently in use - channels such as the Internet, mobile networks and digital TV. This permits our customers to concentrate on their core operations," says Stefan Skarin, CEO at Nocom.

"Through the expertise we have built up over the years, we can give customers the necessary long-term approach and stability. The new contract with Föreningssparbanken is significant and further strengthens our position as a leading provider of advanced IT solutions."
