Nocom Signs Two-Year Contract with Nordbanken

Nordbanken has signed a two-year contract with Nocom AB (publ) for the operation and support of mobile banking services. The new infrastructure is based on Nocom's e-channel center and its platform MobileCtrl™.

"We chose Nocom primarily for their abilities in providing a total undertaking with all the components necessary for good mobile services. Additionally, their solution is well-proven and will give our customers excellent service with full security", says Lennart Larsson, System Development Manager at Nordbanken.

During the past two years, Nocom has made substantial investments in the development of **e-channel center**, with the goal of offering businesses a cost-effective way of setting up and administering electronic customer channels. E-channel center is now established on the market with more than 20 major clients within the banking and financial sectors, and the travel and transportation industries.

"E-channel center is an important part of our product portfolio and reflects our tradition of innovative IT-solutions, service and long-term responsibility. That we have now been entrusted by the leading bank in the Nordic region is proof that our e-channel center is up to standard for the most demanding mobile services", says Stefan Skarin, CEO at Nocom.
