

Digital Vision place their production with NOTE

Digital Vision that construct system solutions for customers within film/video, television and multimedia, has decided to place all manufacturing of electronics with NOTE.

Digital Vision has been a customer of NOTEs Torsby since 1998. The company has at the same time had their own production and final test if the products. The company has now decided to go all the way and let NOTE Torsby take care of the hole production program including service. Some manufacturing will be carried out at NOTEs production unit in Kista. Digital Vision will be one of NOTE Torsby´s largest customers.

- Vi expand the co-operation with Digital Vision even further and we are pleased to have been entrusted the production of complete systems and products, says Gerd Levin-Nygren, President NOTE Torsby.

NOTE Torsby has been running a co-operation project with Digital Vision within the area production technique. Year 2000 the factory in Torsby was awarded the MQS price from the trade for their work to implement the new BGA-technique in the production process. The work was carried out in co-operation with Digital Vision and IVF.

- It is very pleasing for NOTE that we have reached this far in the co-operation with Digital Vision that they now like to go all the way and place their production with us. We like to help our customers by taking care of the hole production program. In that way we can save both time and money for both sides, says Sten Dybeck, CEO, NOTE AB.
