

Nexus develops partnership with NOTE

NOTE AB and Technology Nexus AB has signed an agreement of co-operation around the EMS-services (Electronic Manufacturing Services). This is the second agreement, in a short time, that Nexus sign with a leading manufacturer of electronics. The purpose with the agreements is to create a closer co-operation with the producers that Nexus use for manufacturing of electronics. The agreement means that Nexus can reduce their tied-up capital for components with approximately SEK 7 million.

– Through our partnership with NOTE we see increased possibilities to meet our clients demand for wider commitments, more efficient processes, shorter lead-times and increased cost efficiency, Mikael Jacobsson, President of Nexus, tells us.

– Nexus has worked with NOTE for more than 15 years and we are very pleased to be able to deepen this co-operation further, Mikael Jacobsson continues. – Our clients asks for more and more sophisticated solutions, with high demands for quality and security, and NOTE is a partner with large experience of manufacturing this kind of products, Mikael Jacobsson concludes.

– We see the co-operation with Nexus as a further step in our development to be the natural choice when our clients are in the market to select their EMS supplier, NOTEs chairman Sten Dybeck tells us. – In light of the hard market conditions today exchange of different components is a vital part to keep the jobs in Sweden, Sten Dybeck concludes.
