Increased focus on mobile solutions for companies **Nocom launches Mobilectrlä intranet**

Nocom AB (publ) is launching Mobilectrl™ Intranet, one of the market's first mobile solutions for intranet services. The platform is specifically designed for companies and organizations that wish to provide their employees with fast, secure and high-quality information through a mobile information channel over which they have full control.

“Nocom Mobilectrl Intranet enables companies to provide IT support to staff out in the field, regardless of what sort of WAP phone, palmtop (PDA) or operator they are using,” says Roger Jonneryd, business manager for mobile solutions at Nocom. “Our platform provides companies with a cost-effective and future-proof solution that helps improve the efficiency of everyday company processes and procedures.”

Nocom Mobilectrl Intranet has been developed in close collaboration with users who have tested and evaluated the new technology via WAP Direct, Nocom's fast and secure management solution for mobile services. The aim of Mobilectrl Intranet is to offer companies a platform that can be easily adapted to the increased need for companies to provide IT support for the mobile world. The system offers, for example, field technicians, sales people and others direct contact with their company's IT systems for, among other things, ordering, time recording, and work requisitioning and follow-up.

Mobilectrl Intranet is part of Nocom's range of ASP (application service provider) services, which is being launched under the name of Mobilectrl™.Net. Other products include Mobilectrl™ Finance and Mobilectrl™ Travel.
