# IAR Systems delivers complete starter kit for high-performance STM32F407ZG microcontroller

Uppsala, Sweden—November 22, 2011—IAR Systems® today announces a new 32-bit kit for STMicroelectronics' first ARM Cortex-M4 based microcontroller series—STM32 F4. IAR KickStart Kit™ for STM32F407ZG includes an evaluation board featuring an STM32F407ZG microcontroller, an IAR J-Link Lite debug probe for ST's Cortex-M devices providing JTAG and SWD connections to the board, and a CD with software tools, example projects, and board support packages for different RTOSes.

The STM32 F4 series is the highest-performance ARM Cortex-M processor-based microcontroller range in the market. It is optimal for low-power applications. IAR Embedded Workbench® offers a powerful tool suite for energy saving systems, which makes it a perfect match for the low-power STM32 F4 family.

IAR KickStart Kit for STM32F407ZG is in stock and available in IAR Systems e-shop: [www.iar.com/Products/E-shop](http://www.iar.com/Products/E-shop). It is priced at EUR 209/USD 289. The part number is KSK-STM32F407ZG-JL.

More information is available at [www.iar.com/kits](http://www.iar.com/kits).

### About IAR Systems

IAR Systems is the world's leading supplier of software tools for developing embedded systems applications. The software enables over 14 000 large and small companies to develop premium products based on 8-, 16-, and 32-bit microcontrollers, mainly in the areas of industrial automation, medical devices, consumer electronics, telecommunication and automotive products. IAR Systems has an extensive network of partners and cooperates with the world's leading semiconductor vendors. IAR Systems is listed on NASDAQ OMX Stockholm via its owner Intoi AB. Intoi AB is being renamed IAR Systems Group. When the amendment is registered with the Companies Registration Office, the company's ticker symbol on the NASDAQ OMX will become IAR.
