IAR Systems adds functionality to functional safety certified Renesas RH850 development tools

Stockholm, Sweden—October 22, 2020— IAR Systems®, the future-proof supplier of software tools and services for embedded development, adds new functionality to its development tools for Renesas' RH850 automotive microcontrollers (MCUs).

Through IAR Embedded Workbench, IAR Systems provides its customers with the market's most diverse MCU support as well as adapted licensing options to fit different organizations' needs, including a functional safety edition certified by TÜV SÜD according to IEC 61508, ISO 26262 and EN 50128. This flexibility is extended to the build environment as the build tools supports implementation in Linux-based frameworks for automated application build and test processes.

More information about IAR Embedded Workbench for Renesas RH850 is available at www.iar.com/iar-embedded-workbench/tools-for-rh850/.
