

# XMReality addresses new use cases with a new product version tailored to planned activities

XMReality has launched several new product capabilities making the product tailored for planned remote activities such as inspections and audits. Customers can now schedule sessions in advance, use pre-defined step-by-step instructions in a live call and automatically generate PDF documentation for the call. This helps customers both perform and document planned activities with consistency and high quality.

Being able to schedule calls and invite participants in advance makes it easy to use XMReality for planned remote activities. Once in a call, pre-defined step-by-step instructions ensure that the person guiding a remote task does so with guaranteed consistency, no matter their previous experience.

When a remote task is done, creating consistent and high-quality documentation of the call and the tasks performed is essential for knowledge transfer and quality purposes. With the addition of automated PDF report creation, users are now given high quality documentation of their remote tasks with the press of a button.

*"We have worked closely with our current customer base to, yet again, make sure that our product evolves to meet the market's needs. Organizations using step-by-step instructions reduce the risk for errors, introduce new personnel faster and perform all remote tasks with consistency no matter who leads them, and when or where it is done." says Alexander Sandström CTO at XMReality. "Together with automated call documentation, step-by-step instructions make it easy for our customers to increase quality in their planned remote work."*

## About XMReality Remote Guidance™

XMReality Remote Guidance is an AR-enabled knowledge sharing tool that lets you communicate with gestures, speech, chat and pointers with someone at a completely different place. It includes:

- A unique hands-overlay technology that lets you guide someone else's hands—as if you were there.
- A web portal to manage teams and users, and to measure usage
- Integration through client-side API's (Application Programming Interfaces)

## About XMReality

XMReality AB (publ) develops and sells solutions that revolutionize knowledge transfer through so-called Augmented Reality (AR). The company is a market leader in remote guidance where you guide a person on site via AR to solve problems or prevent them from occurring. The product is used globally in more than 60 countries. ABB, Nestlé, Electrolux, Sidel, Heineken and Saab are examples of the more than 100 customers. XMReality is based in Linköping and

in the U.S. and is listed on the Nasdaq First North Growth Market (ticker: XMR). For more information, visit: [www.xmreality.com](http://www.xmreality.com)
