

XMReality selected by Freudenberg e-Power Systems

Freudenberg e-Power Systems, a global leader in the development and production of emission-neutral energy systems for heavy-duty applications, has started to use XMReality for field service operations. Freudenberg is dedicated to providing energy systems contributing to a sustainable and clean future, and with XMReality Remote Guidance they are making field service operations more sustainable through less travel.

Freudenberg e-Power Systems offers a wide range of solutions, including battery systems, fuel cell systems, and combined systems that are used in a variety of industries, including commercial vehicles, marine vessels, and stationary applications. XMReality will initially be used to provide field service and support for battery cells for cruise ship operations. By using remote guidance, Freudenberg can ensure fast and efficient field support of their battery cells no matter where the cruise ships are located by simply initiating an XMReality call.

“We are excited to support a global leader like Freudenberg as it continues to develop energy systems that help its customers reduce their environmental impact, improve their efficiency, increase their reliability, and reduce their maintenance costs,” said Tim Koepl, President at XMReality, Inc. “Freudenberg is a leader in combating air pollution and climate change through the use of clean commercial energy systems and we are proud to contribute to that work.”

About Freudenberg e-Power Systems

Freudenberg e-Power Systems' global headquarters is in Munich, Germany with major facilities in the United States, Asia and Europe. The company is part of the Freudenberg Group which employs more than 50,000 people to serve its global customer base. For more information visit: <http://www.freudenberg-eps.com/>

About XMReality Remote Guidance™

XMReality Remote Guidance is an AR-enabled knowledge sharing tool that lets you communicate with gestures, speech, chat and pointers with someone at a completely different place. It includes:

- A unique hands-overlay technology that lets you guide someone else's hands—as if you were there.
- A web portal to manage teams and users, and to measure usage
- Integration through client-side API's (Application Programming Interfaces)

About XMReality

XMReality AB (publ) develops and sells solutions that revolutionize knowledge transfer through so-called Augmented Reality (AR). The company is a market leader in remote guidance where you guide a person on site via AR to solve problems or prevent them from occurring. The product is used globally in more than 60 countries. Nestlé, Electrolux, Sidel, Heineken and Saab are examples of the more than 135 customers. XMReality is based in Linköping and in the U.S. and is listed on the Nasdaq First North Growth Market (ticker: XMR). For more
