

Tangiama Receives Loto-Quebec Jurisdictional Certification

Tangiama Touch Technology AB is excited to announce that it has received the final jurisdictional certification for Loto-Quebec. This milestone marks a significant achievement for Tangiama, enabling the installation of the MultiPLAY Roulette gaming tables at Montreal Casino, the largest casino in Canada, and other casinos in the Quebec province.

Chris Steele, CEO of Tangiama, stated, "This certification is more than just a procedural achievement; it's a gateway to new opportunities. We're now well positioned to replicate this success in other regulated jurisdictions, potentially leading to increased sales and new partnerships."

More importantly, the Loto-Quebec installation is set to become a showcase for Tangiama's innovative gaming solutions. This installation will serve as a testament to the product's quality, reliability, and appeal in a highly regulated and competitive market. It will act as a key reference point for potential clients and partners, demonstrating the capabilities in a real-world setting.

The implications of this certification are many. It enhances Tangiama's credibility and reputation in the industry, opening doors to new markets and opportunities. It also reaffirms the company's commitment to meeting stringent regulatory standards, ensuring that Tangiama products consistently deliver excellence and reliability. The certification also aligns with the company's market expansion plans. This achievement will be leveraged to explore new territories and introduce cutting-edge gaming solutions to a broader audience.

With this certification, Tangiama is poised to recognize the remaining revenue from the order, positively impacting the company's financial statements. Also, the revenue will bolster the company's cash position, providing a foundation for strategic initiatives in 2024.

Investors and stakeholders can access a detailed investor report for comprehensive insights into Tangiama's future prospects. This report is available (in Swedish) on Analyst Group's website at <http://analystgroup.se/bolag/tangiama-touch>.
