

# Tangiamo Showcases AI-Enhanced Closed Dome Dice Shaker at G2E Asia 2024

**Tangiamo, a leading innovator in casino game technology, is showcasing its closed dome dice shaker, now enhanced with industry-leading AI dice recognition, at G2E Asia 2024. This cutting-edge product builds upon the company's proven and patented technology that has transformed casino floor operations with unparalleled accuracy, security, and game speed.**

The AI-powered dice recognition system by Tangiamo all but eliminates human error in dice game results, protecting casinos from potentially costly mistakes and disputes while fostering complete player trust in the fairness of games.

Chris Steele, CEO with Tangiamo, states: "Tangiamo stands out as the first and only company leveraging the power of AI and machine learning for unparalleled dice recognition accuracy. We're committed to continuously pushing boundaries within the casino industry, and our AI-enhanced closed dome dice shaker is a testament to this."

The dice shaker technology is designed for seamless integration with third party systems and delivers instant, precise readings, accelerating gameplay and maximizing games played per hour. Tangiamo's technology achieves over 99% accuracy in live environments, providing players with a transparent gaming experience and ensuring that the outcome of every roll is verifiably fair and trustworthy.

With a well-established presence in the Asian market, Tangiamo's technology powers popular games across the region. The company now steps forward with this improved closed dome dice shaker, providing casinos with a direct solution for enhanced security and revenue generation.

The new closed dome dice shaker will be available for demonstration with Abbiati Casino Equipment at G2E Asia, 4-6 June 2024, Stand: B1538.
