

# Tangiamo and Trustplay Begin Development on New AI-Powered Game Studio

**Tangiamo Touch Technology AB (publ) ("Tangiamo"), together with its newly acquired subsidiary Trustplay, is excited to announce the development of a cutting-edge, in-house game studio. This new initiative will focus on creating AI-powered live dice and table games, marking a step forward in Tangiamo's mission to bring innovative gaming solutions to both land-based and online markets.**

The new AI-powered game studio will be dedicated to developing immersive and engaging content, leveraging Tangiamo's advanced dice recognition and AI technology alongside Trustplay's digital gaming infrastructure. This strategic venture positions Tangiamo and Trustplay to capitalize on the growing demand for interactive and dynamic live gaming experiences that bridge the gap between traditional and digital platforms.

"This new game studio represents a significant leap forward in our vision to blend AI-driven technology with captivating gameplay. By developing in-house, we can retain full creative control, accelerate our content roadmap, and ensure that our offerings are not only unique but also aligned with the demands of modern players. Our focus will be on delivering real-time, interactive gaming experiences that keep players engaged across multiple channels, from land-based casinos to online platforms," said Chris Steele, CEO of Tangiamo.

The first wave of content from the new game studio is expected to roll out by mid-2025, with an emphasis on live dice and table games. This includes leveraging Trustplay's remote gaming server (RGS) and streaming platform, which will allow the new games to be distributed seamlessly to operators globally.

Through this new studio, Tangiamo and Trustplay aim to deliver a unique player experience by integrating some of the latest in AI advancements. With AI's capability to learn and respond in real-time, these new games will be able to offer personalized experiences that evolve with the player.

The company's leadership is confident that this development will generate significant interest among operators and players alike, positioning Tangiamo and Trustplay as frontrunners in the next generation of interactive gaming.

Additional updates on content launches, partnerships, and other strategic milestones will be published as the studio's roadmap unfolds.
