

## Gapwaves has received a follow-up order from Uhnder

**Gapwaves has received an order from Uhnder. The delivery consists of additional prototypes for a 77 GHz high-resolution radar intended for robotic transports. The total order value is approximately SEK 1.3 million and delivery is expected to take place during the third quarter of 2021.**

In March 2020 Gapwaves started a collaboration with Uhnder, an Austin, Texas-based company, that has developed a unique digital Radar-on-Chip (RoC), using a combination of advanced CMOS and Digital Code Modulation (DCM) technology. During 2020 and 2021, Uhnder has ordered several follow-up orders on the original project and the radar prototypes that have been jointly developed with components from Gapwaves and Uhnder have shown very good performance. As a continuation of the collaboration, they are now ordering more antennas for test and evaluation.

"The collaboration with Uhnder works very well and further orders from them once again confirm that Gapwave's solution for 77 GHz high-resolution radar is extremely relevant. Furthermore, we see it as proof that the market for last mile deliveries is growing rapidly." Says Gapwave's CEO Lars-Inge Sjöqvist.

### *About Gapwaves AB*

*Gapwaves (NASDAQ: GAPW B) originates from research conducted at Chalmers University of Technology and was founded in 2011. Gapwaves vision is to be the most innovative provider of mm-wave antenna systems and the preferred partner to those pioneering next generation wireless technology. By leveraging the disruptive Gapwaves technology we help pioneers in telecom and automotive to create highly efficient mm-wave antenna systems that contributes to re-defining everyday life. Gapwaves markets are e.g. mmWave in 5G telecom and automotive.*

*Gapwaves share (GAPW B) is traded at Nasdaq First North Growth Market Stockholm and G&W Fondkommission is appointed Gapwaves AB's Certified Advisor.*
