Indutrade acquires the in-line sampling and quality assurance specialist ATLINE

Indutrade has signed an agreement to acquire all shares in the Danish company ATLINE ApS, www.atline.com, with annual sales of approximately DKK 40 million (SEK 60 million).

ATLINE is a leading engineering and manufacturing partner of robotic production equipment for the pet food and feed industries. The company specialises in automating and enhancing the quality assurance processes in manufacturing plants. Its flagship product is a fully integrated, laboratory technology solution that enables customers to automate and improve manual process steps in the production. ATLINE also offers inline sampling equipment, QA reporting software and aftermarket services. The company has nine employees and is located in Kolding, Denmark.

“ATLINE has a strong portfolio of patented products and holds significant technical expertise within its business segment. It has also demonstrated the ability to grow organically in a sustainable and profitable way and has significant potential to expand to adjacent customer segments, making it a valuable addition to the Indutrade-family”, said Bo Annvik, President and CEO of Indutrade.

The closing takes place today and ATLINE will be included in Indutrade's Business Area Life Science. The acquisition is Indutrade's fourth in 2024 and is expected to have a marginally positive impact on Indutrade's earnings per share.
