Note:1) Organic growth calculated based on IFRS numbers including currency exchange for companies included in the entire actual period and the reference period; 2) Adj. EBITA, defined as earnings before interest, taxes, and amortization as well as acquisition expenses. Adj. EBITA serves as an approximation for the cash flow before tax, under the assumption that capital expenditures mirror depreciation, which is normally the case, as Röko invests in asset-light businesses; 3) Based on rolling twelve months financials from management accounts for companies that were part of Röko at the end of each respective period
