

## **Mycronic receives order for two SLX mask writers**

Mycronic AB (publ) has received an order for two SLX mask writers from a customer in the US. The order value is in the range of USD 14-16 million. Delivery of both systems is planned for the first quarter of 2028.

The SLX laser mask writer meets rising demand for photomasks for the semiconductor industry and a need for replacement and modernization. Photomasks manufactured by laser mask writers are of high importance and account for a majority of all photomasks produced for semiconductor manufacturing. SLX is a modern and energy efficient mask writer based on the same technology as Mycronic's mask writers for displays.

"Thanks to the SLX platform's performance, productivity, reliability and our close long term customer collaboration, we are able to successfully continue growing the installed base of SLX mask writers serving the leading edge semiconductor industry", says Charlott Samuelsson, Senior Vice President Pattern Generators at Mycronic.

Mycronic's Pattern Generators division provides mask writers and metrology, inspection and repair systems for display manufacturing and production of semiconductors.
