

## Klappir hf.: Klappir appoints Fossar as financial adviser in relation to a contemplated capital raise in Q2 2026

Klappir Green Solutions hf. ("Klappir") has entered into an agreement with Fossar fjárfestingarbanki hf. ("Fossar"), appointing Fossar as financial adviser and manager in connection with a contemplated capital raise, which is expected to take place in the second quarter of 2026, subject to required approvals under the company's articles of association as well as market conditions.

The agreement was signed on 27 March 2026 and sets out the framework for the parties' cooperation in relation to the contemplated transaction.

It is currently intended that the new shares with an aggregate value of up to EUR 8 million may be offered, subject to a minimum of EUR 2 million. Any new shares issued are expected to be B class shares and are intended to be admitted to trading on First North Iceland, subject to the applicable rules and approvals.

Fossar will advise on and manage the preparation and potential execution of the contemplated transaction. Discussions with prospective investors will be initiated in the upcoming weeks and the structure of the share capital increase will, among other things, be shaped by those discussions. Any further information will be disclosed to the market as required.

The contemplated transaction, if implemented, is intended to support Klappir's continued growth and strengthen its capital structure.

**About Klappir**

Klappir provides a scalable SaaS platform that enables organisations to collect, structure, and utilise resource data in a consistent and actionable way, addressing the growing global demand for resource efficiency, regulatory requirements and increasing data transparency. Built on a proprietary canonical data model, the platform standardises how resource data is governed and shared, allowing customers to improve data quality, streamline reporting, optimise operations, and connect seamlessly with external stakeholders and data ecosystems.

Positioned as a domain-specific data infrastructure provider, Klappir combines Product-Led Growth, Partner-Led distribution, and ecosystem integration to drive efficient customer acquisition, scalable international expansion, and strong operating leverage, targeting a broad and expanding market of organisations seeking to manage and monetise high-quality sustainability and resource data.
