DIVIO

Divio Launches Pure European Managed Hosting Solution

Divio today announces the launch of its fully European managed hosting solution, responding to increasing customer demand for digital infrastructure that is entirely based in Europe.

Building on the company's established Swiss offering — used by customers such as the Swiss Army — Divio is extending its commitment to sovereign cloud infrastructure with a fully European Platform#as#a#Service (PaaS) solution. The new offering ensures hosting infrastructure located exclusively within the European Union or Switzerland.

Over recent months, Divio has seen a growing number of inquiries from both existing and prospective customers seeking a European alternative that is not dependent on U.S.-based providers. The new solution enables customers to deploy and manage their applications within a fully European ecosystem — supporting compliance, data residency requirements, and long-term strategic independence.

"Customers are increasingly prioritizing digital sovereignty and infrastructure independence," said Jon Levin, CEO of Divio. "Building on our strong Swiss foundation, we have developed a comprehensive managed hosting solution that is entirely European. We see this as a significant opportunity and a natural extension of our commitment to secure, compliant, and future-proof infrastructure."

The company's Certified Adviser is FNCA Sweden AB.

About Divio Technologies

Divio Technologies AB (Publ) is the PaaS and Cloud Management Software development group behind the Divio platform, which simplifies cloud hosting, deployment and development via a PaaS solution. The platform allows enterprises to reduce costs, time to market and the burden on employees, as well as decreasing dependency on cloud vendors.
