

Maven Wireless expands into the stadium segment – wins SEK 4 million order in the UK

Maven Wireless has received an order, through a local partner in the United Kingdom, for a Distributed Antenna System (DAS) for critical communications (Public Safety). The system will be deployed at one of the largest stadiums in the London area. The order value amounts to approximately SEK 4 million and marks the company's entry into a new market vertical – the stadium segment.

Delivery and invoicing are scheduled for the first quarter of 2026. The solution will ensure robust and reliable wireless communication, a key requirement for hosting safe and secure large-scale events.

"I am very pleased with our continued expansion into a new vertical. The stadium segment is particularly attractive for DAS solutions, as it typically requires both public safety communication for emergency services and mobile coverage for all operators. In Europe alone, there are around 2,000 stadiums with a capacity exceeding 5,000 visitors,"
said **Fredrik Ekström, CEO of Maven Wireless.**

This order further strengthens Maven Wireless' position as a leading provider of innovative and scalable DAS solutions for both commercial and mission-critical applications.
