

## From plan to real time — Dynamic & Adaptive Salting is here

Klimator releases a major upgrade of Road Status Information (RSI), built together with 1,500 + contributors including operators, supervisors, and road authorities across existing markets. The new RSI is designed to make modern winter operations simpler, faster, and measurably more effective.

“This makes RSI the operational backbone for winter: faster maps, clearer risk insights, and simpler actions for crews. Safer roads. Less salt. Better nights,” said **Søren Pedersen, Head of Winter Maintenance, Klimator AB**.

### How RSI powers smarter salting:

- **Dynamic Salting**  
Plan the dose per road segment. **Compatible spreaders fetch the set-points directly from RSI** and apply them automatically—right time, right amount.
- **Adaptive Salting**  
Start with the plan, then fine-tune on the move. **An onboard vehicle solution** uses live road measurements to **auto-adjust compatible spreaders** in real time—just enough salt, exactly where it's needed.

### Additional upgrades

- **New UX-design** supporting individual, group - and centralized decisions.
- **Segmented road-weather forecasts** and routes with clear confidence for faster go/no-go decisions.
- **Winter Maintenance Index (WMI)** KPIs and contract-ready reporting.

Launching on October 1, 2025. The future — and our winter contractors — are already in motion.

**About Klimator**

Klimator AB is a publicly listed software company with over 30 years of research in applied road climatology. Klimator has two innovations – the data platform Road Condition Data (RCD), providing predictive high precision road weather information, and the sensor fusion solution AHEAD providing real- time detective road weather information. With these innovations, Klimator provides precise and reliable road weather information to the winter maintenance and the automotive industries creating safer roads and enabling scalable autonomous driving (AD) and intelligent driver support systems (ADAS). In 2020, Klimator acquired HedeDanmark's business operations within connected sensors to broaden and strengthen Klimator's product portfolio.
