

## Integrum receives customs duty refund of approximately SEK 2.6 million

**Möln dal, Sweden, June 16, 2026 – Integrum AB (publ) (Nasdaq First North Growth Market: INTEG B) today announces that the company has received an initial refund of approximately SEK 2.6 million from U.S. Customs and Border Protection (CBP).**

The refund relates to customs duties previously paid in connection with trade tariffs imposed by the U.S., but which, following an administrative review, were determined not to be applicable to parts of Integrum's imports.

The refund is the result of a determined effort in which Integrum has analyzed historical customs payments, compiled the necessary documentation, and pursued the matter with the relevant authorities. The company has further ongoing claims relating to previously paid customs duties and will continue this work to ensure that all possible refunds are realized.

The amount has been received in cash and has a positive effect on the company's cash and cash equivalents.

### **About Us**

Integrum AB is a publicly traded company (INTEG B: Nasdaq First North Growth Market) based outside of Gothenburg, Sweden. Since 1990, its OPRA™ Implant System has helped improve the quality of life for hundreds of people who are amputees by directly attaching a prosthesis to the bone and musculoskeletal system, therefore eliminating the need for a socket. Based on osseointegration, the bone-anchored implant system offers a range of benefits, including improved mobility and function, enhanced comfort, reduced pressure, a stable attachment and more. The OPRA™ Implant System was approved by the U.S. Food and Drug Administration (FDA) in 2020 and is the only FDA-approved bone-anchored implant system specifically designed for use in amputees available in the U.S. Today, Integrum continues to perform research and develop custom-made medical device solutions in close collaboration with scientists and clinicians.
