

## Q-linea receives second ASTar order in France

Q-linea AB (publ) (OMX: QLINEA) today announces that the company has received a second order for an ASTar instrument from Eurobio Scientific in France.

“Our partner in France, Eurobio Scientific, is in active discussions with several potential clients in France and the high interest has led to a very busy schedule for Q4, with multiple sites in parallel. Thus, they decided to purchase their second instrument in order to support these placements,” said Thomas Fritz, CCO at Q-linea.

### **About ASTar Instrument and ASTar BC G- Kit**

ASTar Instrument and ASTar BC G- Kit already deliver the broadest answer regarding the combination of the number of antibiotics and the number of double dilution steps of each antibiotic, in a single analysis for gram-negative bacteria. The test enables the analysis of gram-negative bacteria, including difficult-to-grow so-called fastidious bacteria, which satisfies the need for rapid and comprehensive results to support optimal treatment decisions.

ASTar Instrument and ASTar BC G- Kit are CE-marked but not FDA 510(k)-cleared and not available for sale in the United States.

### **About Q-linea**

Q-linea is an innovative infection diagnostics company that primarily develops instruments and disposables for rapid and reliable infection diagnostics. Our vision is to help save lives by ensuring antibiotics continue to be an effective treatment for future generations. Q-linea develops and delivers preferred solutions for healthcare providers, enabling them to accurately diagnose and treat infectious disease in the shortest possible time. The company's lead product ASTar<sup>®</sup> is a fully automated instrument for antibiotic susceptibility testing (AST), giving a susceptibility profile within six hours directly from a positive blood culture. For more information, please visit [www.qlinea.com](http://www.qlinea.com).
