

Q3-2026

INTERIM FINANCIAL REPORT JANUARY-SEPTEMBER 2026

THIRD QUARTER

- Net sales for the third quarter amounted to kSEK 23,511 (16,544).
- The gross margin on sales of goods was 60 (57) %.
- EBITDA was kSEK -4,119 (1,133).
- Result after taxes amounted to kSEK -9,352 (448).
- Earnings per share before and after dilution was SEK -0.12 (0.01).
- The cash flow from operating activities was kSEK -3 838 (1,022).

JANUARY-SEPTEMBER

- Net sales for the nine months amounted to kSEK 63,230 (40,688).
- The gross margin on sales of goods was 55 (59) %.
- EBITDA was kSEK -19,499 (-12,467).
- Result after taxes amounted to kSEK -31,438 (-14,481).
- Earnings per share before and after dilution was SEK -0.42 (-0.21).
- The cash flow from operating activities was kSEK -18,433 (-13,147).
- Cash and cash equivalents on the balance sheet date amounted to kSEK 31,250 (55,454).

SIGNIFICANT EVENTS DURING THE THIRD QUARTER

- Acconeer received order worth USD 230,000 for mass production in the automotive industry.
- Acconeer received order worth USD 160,000 for delivery to the automotive industry.
- Acconeer received order worth USD 100,000 from CODICO.
- Acconeer received USD 1.5 million order for level sensing.
- Acconeer received order worth USD 120,000 for delivery to the automotive industry.
- Acconeer updated financial targets.
- Acconeer received order of USD 210,000 for level sensing in Oceania.

SIGNIFICANT EVENTS AFTER THE END OF THE PERIOD

- Acconeer received order worth USD 270,000 for delivery to the automotive industry.
- Acconeer received order of USD 120,000 for the Japanese market.

COMMENTS FROM OUR CEO

Demand for our solutions continues to develop positively, and net sales for the third quarter amounted to SEK 23.5 million – marking the fifth consecutive quarter of record sales. It is particularly gratifying to see a significant improvement in the product sales margin, which rose to 60%, compared to 53% in the previous quarter. During the quarter, we delivered half a million radar sensors and modules, the highest volume in the company's history. We also reached the milestone of 5 million total radar sensors delivered. As mentioned in connection with our recently updated financial targets, I expect this growth trend to continue through the fourth quarter. The target of a first cash flow positive quarter in 2026 remains.

During the quarter, we were pleased to secure our largest-ever order outside the automotive industry, worth SEK 14 million, from a US-based global leader in level measurement. This is a segment where we have long held a strong position and where we continue to see significant growth potential. We also initiated a deeper collaboration with this same client, developing a solution supported by non-recurring engineering (NRE) payments to facilitate expansion into new segments.

In the automotive industry, we are seeing increased volumes for hands-free trunk opening, and a new Japanese car manufacturer launched its first model featuring the A121 during the quarter. We also participated in the InCabin trade show in Barcelona, where Alps Alpine showcased their world-leading in-cabin monitoring solution, based on our A212 radar.

An important part of our strategy and future growth is A212 outside the automotive industry. During the quarter, we have increased the maturity of this offering, enabling several customers to move forward. There is strong interest, we have sold hundreds of evaluation kits to customers in recent months, several have ordered sensors for prototype builds and we recently received our first limited volume order from a customer in obstacle detection.

During the quarter, the value of inventory increased by SEK 8.5 million as a result of the strained capacity situation in the global semiconductor market. To secure priority with suppliers, higher production volumes were required, which led to an increased buildup of inventory. Throughout the quarter, we have engaged in extensive work with our suppliers to ensure production capacity

for our future growth. We anticipate that inventory levels will gradually decrease going forward.

During the quarter, we updated our financial targets:

- First cash flow positive quarter during 2026 (unchanged)
- Revenue growth of at least 100% for full year 2027 compared to 2026 (previous: Revenues of more than SEK 300 million in 2027)
- Long-term EBIT margin of at least 25 per cent (unchanged).

The revenue target for 2027 was revised due to lower forecasts for launched vehicle models that utilize Acconeer A1 sensors, as well as delays in finalizing the product offering for the A212 outside the automotive industry.

I am very confident regarding the company's future development. Our established A111 and A121 sensors continue to drive growth, supported by strong demand and new collaborations across several product areas. Meanwhile, the A212 is now qualified for mass production and given significant customer interest and the increased maturity of our product offering, I see great potential to further accelerate our growth.

Malmö, 23 October 2026

Ted Hansson, CEO of Acconeer AB (publ)

SHIPPED SENSORS AND MODULES

THIRD QUARTER NET SALES AND RESULT

Net sales for the third quarter amounted to kSEK 23,511 (16,544) i.e. an increase of 42 % compared to the previous year. Net sales relate to sales to customers directly and through distributors and income from development-related services.

Gross profit, which only includes direct cost of goods, amounted to kSEK 14,240 (10,621) which corresponds to a gross margin of 61% (64%). Reduced with revenues from development related services, gross profit amounted to kSEK 13,680 (7,877) which corresponds to a gross margin of 60% (57%). Product mix between our sensors, modules and development kits affects the gross margin as does fluctuating costs of components.

Compared to the third quarter of the previous year, operating expenses increased with 114% to

kSEK 24,689 (11,550), mainly due to increased RnD costs affected by reduced capitalization, that was kSEK 2,909 (8,048), and commenced amortization of A2, which amounted to kSEK 4,935 (0). Amortization and depreciation of balanced development costs, patents and inventories was made during the third quarter with kSEK 5,884 (913). EBITDA, see Note 3, for the third quarter was kSEK -4,119 (1,133). The operating profit for the third quarter amounted to kSEK -10,003 (220) and the profit after tax amounted to kSEK -9,352 (448). The reduced capitalizations together with higher depreciation have a negative effect on operating profit compared to the third quarter of 2025 of kSEK 10,110.

The average number of employees during the period was 49 (50), of which 6 (6) were women.

NINE MONTHS NET SALES AND RESULT

Net sales for the nine-month period amounted to kSEK 63,230 (40,688) i.e. an increase of 55 % compared to the previous year. Net sales relate to sales to customers directly and through distributors and income from development-related services.

Gross profit, which only includes direct cost of goods, amounted to kSEK 36,086 (27,008) which corresponds to a gross margin of 57% (66%). Reduced with revenues from development related services, gross profit amounted to kSEK 32,740 (19,858) which corresponds to a gross margin of 55% (59%). Product mix between our sensors, modules

and development kits affects the gross margin as does fluctuating costs of components.

Compared to the nine-month period of the previous year, operating expenses increased with 66% to kSEK 71,959 (43,216) mainly due to increased RnD costs affected by reduced capitalization, kSEK 12,424 lower than previous year, and commenced amortization of A2, which amounted to kSEK 11,515 (0). EBITDA for the nine months was kSEK -19,499 (-12,467). The operating profit for the nine-month period amounted to kSEK -33,781 (-15,048) and the profit after tax amounted to kSEK -31,438 (-14,481).

INVESTMENTS, LIQUIDITY AND FINANCIAL POSITION

On 30 September 2026 the cumulative book value of balanced costs for development work amounted to kSEK 140,283 (130,380). Since Q3 2023 the amount refers to development work related to the next generation radar sensor A2, as A1 is fully amortized. During the nine-month period kSEK 13,616 (16 %) of total costs of kSEK 85,575 were capitalized, compared with the previous year when kSEK 26,040 (38%) of total costs of kSEK 69,256 were capitalized. The nine-month period's amortization of capitalized development costs amounts to kSEK 11,515 (0).

The corresponding patent portfolio value amounted to kSEK 2,336 (2,335) most of which is due to investments in patents and patent applications related to the A1 product. Acconeer has 14 patent families including in total 25 granted patents and 9 pending patent applications. The patent portfolio covers various geographic regions, including the U.S., Europe, Japan and China.

Accumulated investments infixed tangible assets has been financed from the company's own resources, and amounted to kSEK 16,247 (16,880).

The inventory has increased with 14% since the turn of the year due to the strained capacity situation in the global semiconductor market, which requires larger production volumes. The main reason for the high inventory value is the large orders placed on the radar sensor A111 where demand has not yet materialized.

Accounts receivable amounted to kSEK 15,091 (9,715) on 30 September 2026, an increase of 55% due to increased sales at the end of the period.

The cash flow from operating activities during the nine-month period amounted to kSEK -18,433 (-13,147).

After changes in working capital the cashflow for the period was kSEK -25,589 (-16,421). Cash flow has been negatively affected by the increased inventory.

At the balance sheet date, cash and cash equivalents amounted to kSEK 31,250 (55,454).

Total equity amounted to kSEK 254,792 (262,142).

Equity ratio was 93 (94) percent.

The Group is small and not covered by requirements for consolidated accounts, therefore no Group Accounts has been prepared.

SIGNIFICANT EVENTS DURING THE THIRD QUARTER

On 14 July Acconeer received an order worth USD 230,000 for mass production in the automotive industry. The order related to the radar sensor A121 for mass production in the automotive industry with delivery planned for the fourth quarter of 2026. The order came from a leading Japanese distributor with a particularly strong position in the automotive industry who is Acconeer's long term partner in the automotive industry.

On 27 July Acconeer received an order for delivery to the automotive industry, worth USD 160,000. The order related to Acconeer's radar sensor A212 for mass production within the automotive industry, where it will be used for multiple in-cabin applications at a European premium vehicle manufacturer. The order came from a leading Japanese distributor with a particularly strong position in the automotive industry, and delivery is planned for the first quarter of 2027.

On 13 August Acconeer received an order worth USD 100,000 from CODICO. The order related to Acconeer's A111 radar sensor for customers' mass production of parking sensors. Delivery is planned for Q4 2026 and in 2027. CODICO is a leading distributor in Europe, headquartered in Vienna, Austria.

On 20 August Acconeer received a USD 1.5 million order for level sensing. The order related to the XM132 module and came from a US-based, global

leader in design and manufacturing of liquid level gauges and sensors. Delivery is planned continuously until end of 2027.

Another order for delivery to the automotive industry was received on 7 September. The order, worth USD 120,000, related to the radar sensor A121 for mass production. The order came from a leading Japanese distributor with a particularly strong position in the automotive industry, and delivery is planned for the first quarter of 2027.

On 8 September the Board of directors in Acconeer AB announced that they had decided to revise the company's financial targets. The targets for the company are to have a cash flow positive quarter during 2026 (unchanged), at least 100% revenue growth 2027 compared to 2026 (previous: revenues of more than SEK 300 million in 2027), and a long-term EBIT margin of at least 25 per cent (unchanged).

Acconeer received an order of USD 210,000 for level sensing on 17 September. The order came from Glyn Limited and related to the A121 radar sensor and will be used for customers' mass production. Delivery will be done continuously during a year starting from Q4 2026. Glyn is Acconeer's distributor in Australia and New Zealand and has been a partner of Acconeer since 2019.

SIGNIFICANT EVENTS AFTER THE END OF THE PERIOD

On 8 October an order worth USD 270,000 for delivery to the automotive industry was received. The order related to the radar sensor A121 for mass production within the automotive industry. The order came from a leading Japanese distributor with a particularly strong position in the automotive industry, and delivery is planned for the first half of 2027.

On 20 October Acconeer received an order of USD 120,000 for the Japanese market. The order came from Japanese Micro Summit K.K. and related to the radar sensor A121 and the XM123 radar module. The products will be delivered during the coming six months to be used in customers' mass production. Micro Summit K.K. is one of Acconeer's distributors in Japan.

ACCOUNTING AND VALUATION POLICIES

This interim financial report is prepared in accordance with the Swedish Annual Accounts Act as well as the Swedish Accounting Standards Board BFNAR 2012:1 annual report and consolidated (K3).

More information about the company's accounting policies can be found in the 2025 annual report, on pages 31-34. The accounting policies are the same.

Considering that Acconeer not yet achieved any full-scale production only material costs are reported in Cost of goods sold. The sourcing and supply function's costs are included in Selling expenses and depreciation on tangible and amortization of intangible fixed assets is distributed among the different functions. More information can be found in Note 1 and 2.

Revenue has been recognized at the fair value of the consideration received or receivable to the extent that it is likely that the financial benefits arising from it will be available to the company and can be reliably

calculated.

Acconeer's sale of goods is taken as income in its entirety when the risk passes to the buyer in accordance with delivery terms. In cases where sales are made to a distributor, the revenue recognition takes into account any returns and discounts. Revenue from development-related services relates to the company's development of the new sensor A2 together with an external party, Alps Alpine. This is a fixed-price contract. The project is divided into different Milestones and revenue is recognized on a straight-line basis over the duration of each Milestone, taking into account the degree of completion.

Amounts expressed in kSEK and MSEK in this interim report refer to thousands and millions of Swedish kronor, respectively. Numbers within parentheses refer to values from the corresponding period in the preceding year.

KEY RISKS AND UNCERTAINTY FACTORS

A description of Acconeer's key risks and uncertainty factors can be found in the 2025 annual report, on page 21-24. No significant changes have taken place since then.

SHARE PERFORMANCE

Since the beginning of 2026, the share price has decreased by approximately 14 %. At the end of September 2026, the total number of shares amounted to 76,141,532 shares.

FINANCIAL TARGETS

Acconeer has announced the following financial targets:

- First EBIT positive quarter in 2025. This target was reached in Q3 2025.
- First cash flow positive quarter during 2026.
- Revenue growth of at least 100% for full year 2027 compared to 2026 (previous: Revenues of more than SEK 300 million in 2027)
- Long-term EBIT margin of at least 25 per cent.

UPCOMING FINANCIAL INFORMATION

*DEFINITIONS OF INDICATORS

Gross margin = Gross profit as a percentage of net sales.

Gross margin, referring to sales = Regarding the cost of goods sold, only the material cost is included. Costs for the sourcing and supply function are reported in Sales expenses and depreciation and amortization on tangible and intangible fixed assets is distributed among the different functions.

Operating margin = Operating result as a percentage of net sales.

EBITDA = Earnings Before Interest, Taxes, Depreciation, and Amortization.

Earnings per share = Net income after taxes divided by the average number of shares during the period.

Cash flow per share = Cash flow from operating activities during the period, divided by the average number of shares during the period.

Solidity = Total equity on the balance sheet date, divided by the balance sheet total on the balance sheet date.

Equity per share = Equity on the balance sheet date divided by the number of shares on the balance sheet date.

Note 1 Net sales

TSEK	2026 JUL-SEP	2025 JUL-SEP	2026 JAN-SEP	2025 JAN-SEP	2025 FULL YEAR
Sales of goods	22,951	13,800	59,884	33,538	49,401
Development-related services	560	2,744	3,346	7,150	8,472
Total net sales	23,511	16,544	63,230	40,688	57,873

Note 2 Information about the company's operating expenses

For the period January-September, the sourcing and supply function (formerly the operations function) including cost of goods sold amounted to kSEK 30,770 (17,511). The sourcing and supply function's costs are included in Selling expenses.

All depreciation and amortization on tangible and intangible fixed assets amounted to KSEK 14,283 (2,581) and is distributed among the different functions. The increase is related to the amortization of A2 which began on March 1, 2026 and represents kSEK 11,515 of the amount.

Note 3 EBITDA

TSEK	2026 JUL-SEP	2025 JUL-SEP	2026 JAN-SEP	2025 JAN-SEP	2025 FULL YEAR
Operating result	-10,003	220	-33,781	-15,048	-21,218
Depreciation and Amortization	5,884	913	14,282	2,581	3,492
EBITDA	-4,119	1,133	-19,499	-12,467	-17,726

ACONEER IN BRIEF

Acconeer has created a radar sensor that combines the best of existing radar technologies and creates new opportunities for human interaction with technology. The radar sensor is able to combine the low power consumption of a pulsed system with the high accuracy of a coherent radar in a component small enough to fit on a fingertip.

Through its compact size, cost-effectiveness and low energy consumption, Acconeer's radar technology is highly competitive in a range of applications that require precise distance and motion measurement.

A LARGE AND GROWING MARKET

Based on key industry trends, Acconeer's market, 3D sensing, is expected to keep growing rapidly. The growth is driven partly by an increased need for data collection in new application areas, and partly by radar technology increasingly replacing sensors based on ultrasound, infrared light and camera technology. Acconeer's current focus is on the following segments:

Automotive

Presence Detection

Cargo Detection

Level measurement

Industry and automation

In all of these areas, intensive development of new applications is underway that place higher demands on advanced sensor solutions, for example for presence detection including measurement of vital signs, vibration measurement and material recognition. The development potential for how radar technology will shape our everyday lives in the coming years is considered significant.

PROMISING AND ATTRACTIVE GROWTH AND RETURNS

Acconeer's products have been in mass production since 2018. After an initial phase of broad market development to identify the most promising business areas, the company adopted a more focused strategy with strengthened sales efforts in 2024. As Acconeer's sensors are implemented in high-volume products, the conditions for a profitable business are created, and this growth journey is currently ongoing.

HEADQUARTERS IN MALMÖ AND THE EXPERIENCED MANAGING BODY

Acconeer has a competent and experienced managing body and board. The company is directed by CEO Ted Hansson. Co-founders Mats Ärlelid and Mikael Egard are responsible for developing the new radar technology, and are co-inventors of several of the patents.

LISTED ON FIRST NORTH GROWTH MARKET

The Acconeer share is listed on First North Growth Market, Stockholm, since 11 December 2017.
