

Enersize partner SCOPP grow their footprint – Receives new orders from major brands in Africa

Enersize Advanced Research AB continue to grow business in Morocco through the local partner SCOPP Solutions SARLAU Capital 100.000DH (“SCOPP Solutions”). The recent orders are for Vivo Energy Maroc and Maghreb Steel and will be delivering energy reduction based on Enersize software solutions and processes.

“We are very happy to see the work from our partner SCOPP Solutions attract more customers in Africa. To see companies like Vivo Energy Maroc and Maghreb Steel chose Enersize solutions is a proof point that we offer a unique offering for energy optimization of industrial compressed air”, says Anders Sjögren, CEO of Enersize.

Enersize has developed a model for compressed air optimization, where the first stage Xray includes a complete screening of the customer’s compressed air system using portable data logging equipment specifically developed to identify leakage and inefficient use and generation of compressed air. Based on the initial insight through Xray the next step is to carry out the energy reductions identified – establishing an energy saving and lowering carbon footprint.

“The new orders are steps ahead along the Enersize Way, to work toward energy optimization after the initial Xray” says Achraf Zerhouni, SCOPP Solutions. “Maghreb Steel is a major player in the Steel industry in Morocco and Vivo Energy Maroc is the most respected petroleum business in Africa. To see these giants take their next step in the partnership with us to deliver on their sustainability targets is adding credibility to our work and the value we deliver”.

More about SCOPP Solutions

SCOPP Solutions is a Moroccan company established in 2013. The company delivers consulting services in North Africa in Many sectors: Petroleum, Mining, Cement, Steel, Automotive & Agribusiness.

SCOPP Solution’s strategy has been reviewed during 2020 Covid-19 lockdown to focus on digital energy efficiency solutions. The company has set new partnerships and started promoting those since September 2020. Despite Covid restrictions and the economic downturn, the company has been receiving positive response from the market showing a good fit for the new services to industrial energy efficiency challenges.
