

Cavotec supports Qwello's expansion of EV charging stations with spring cable reels across Europe

Cavotec has deepened its partnership with Qwello by signing an order for 1,000 spring cable reels for electric vehicle charging stations across Europe. The order was signed at the end of 2024.

Qwello is a German company that develops and operates charging stations for electric vehicles in Europe. Designed to meet the demands of modern EV charging infrastructure, Cavotec's spring cable reels offer reliability, durability and ease of use. These features are crucial as the demand for robust and scalable EV charging solutions continues to grow in line with Europe's ambitious sustainability goals.

"The market for public charging points is growing across Europe and the collaboration with Qwello shows that we have an attractive offering", says Jonathan Eriksson, Senior Vice President and Head of Industry Division. "This collaboration is also important for us as we contribute to the transition towards a zero-emission society".
