

Northern Ireland Ambulance Service is upgrading its MobiMed system with new hardware

Ortivus is pleased to announce that the Northern Ireland Ambulance Service (NIAS) has chosen to upgrade its installation of MobiMed ePR, electronic patient records, with new modern hardware. The value of the new order is estimated to be £250.000.

The Northern Ireland Ambulance Service (NIAS), a customer of Ortivus since 2019, utilizes MobiMed ePR in its daily operations and in their approximately three hundred ambulances. The trust has now chosen to award Ortivus a new contract covering upgraded hardware for its existing electronic patient record system. The contract includes Panasonic TOUGHBOOK computers of the G2 model for a large number of NIAS's ambulance vehicles.

"The fact that NIAS chooses to invest in its MobiMed solution by upgrading to new and modern hardware is very positive. Now the customer will have the latest tablet from Panasonic Toughbook, a model that is robust and well-suited for the work of ambulance personnel in the field", says Elias Obaid, Global Sales Manager at Ortivus.

The contract can earliest be signed after a period of 10 days from the date of the award, in accordance with the procurement regulations.

About Ortivus

Ortivus develops and commercialises MobiMed, e-health and medical technology solutions for a safer and more efficient healthcare. The company was founded in 1985 and is today a leading provider of mobile digital solutions for prehospital care, worldwide. Ortivus' innovations are based on in-depth expertise in cardiology as well as decades of development together with users and customers. The company's headquarters are located in Danderyd, Stockholm. The company has, since 1998, a wholly owned subsidiary based in the United Kingdom and since 2022, a wholly owned subsidiary based in Denmark.

MobiMed is a modular platform that connects and enable real-time information sharing throughout the prehospital care chain. It is currently used by over 12,000 paramedics in over 2,700 emergency vehicles. The platform, MobiMed, consists of several product modules that are completely integrated but can also be used stand-alone. MobiMed comprises four main solutions: MobiMed Monitor, that measures, monitors and shares patients' vital parameters and ECG in real-time, MobiMed ePR, - an electronic patient record for decision support, collection of patient data and clinical documentation, MobiMed enRoute, - a tool for navigation and case management, and MobiMed Life - a range of stand-alone defibrillators.

MobiMed saves vital seconds and enable healthcare professionals make the right decisions in critical situations. MobiMed also contributes to improved quality of care and saved resources.

Ortivus Class A and Class B shares are listed on the NASDAQ Stockholm Small Cap list.
