

Elliptic Labs Shipping on vivo IQOO Neo10 Pro+ and vivo S30 Series Smartphones

Oslo, Norway — [Elliptic Labs](#) (OSE: [ELABS](#)), a global AI software company and the world leader in AI Virtual Smart Sensors™ currently deployed in over half a billion devices, has shipped its AI Virtual Proximity Sensor™ INNER BEAUTY® on vivo's IQOO Neo10 Pro+ and S30 Series smartphones. vivo, a global top-5 smartphone maker, is launching both the IQOO Neo10 Pro+ and vivo S30 Series smartphones for the global market. The vivo IQOO Neo10 Pro+ and S30 utilize chipsets from Elliptic Labs' [partner Qualcomm's](#), with the S30 using the [Snapdragon 7 Gen 4 chipset](#) and the IQOO Neo10 Pro+ using the [Snapdragon 8 Elite](#). The vivo S30 Pro Mini uses Elliptic Labs' [partner MediaTek's flagship Dimensity 9300+ chipset](#). Elliptic Labs announced the [contract for this shipment in January 2024](#).

“The vivo IQOO Neo10 Pro+ and S30 Series smartphones are the latest additions to the lineup of models shipped with vivo in 2025, bringing the total to 13 smartphone models launched through our collaboration. Altogether, Elliptic Labs has shipped on 31 smartphone models so far this year,” said Laila Danielsen, CEO of Elliptic Labs. “Elliptic Labs’ AI Platform offers unique advantages to the biggest smartphone OEMs like vivo, leveraging our 100% software approach and full stack expertise to deliver industry leading precision, scalability, and value.”

AI Virtual Proximity Sensor INNER BEAUTY

Elliptic Labs’ AI Virtual Proximity Sensor detects when a user holds their phone up to their ear during a call, allowing the smartphone to turn off its display and disable its screen’s touch functionality. This keeps the user’s ear or cheek from triggering unwanted actions during the call, such as hanging up or dialing numbers. Turning off the screen also helps conserve battery life.

Proximity detection is a core capability that is used in all smartphones, but Elliptic Labs’ AI Virtual Proximity Sensor is a unique, software-only solution that delivers robust proximity detection without the need for a dedicated hardware sensor. By replacing hardware sensors with software sensors, the AI Virtual Proximity Sensor reduces device cost and eliminates sourcing risk.

About Elliptic Labs

Elliptic Labs' AI Virtual Smart Sensor Platform™ brings contextual intelligence to devices, enhancing user experiences. Our technology uses proprietary deep neural networks to create AI-powered Virtual Smart Sensors that improve personalization, privacy, and productivity.

Currently deployed in over 500 million devices, our platform works across all devices, operating systems, platforms, and applications. By utilizing system-level telemetry data to cloud-based Large Language Models (LLMs), the AI Virtual Smart Sensor Platform delivers the unrivaled capability to utilize output data from every available data source. This approach allows devices to better understand and respond to their environment, making technology more intuitive and user-friendly. At Elliptic Labs, we're not just adapting to the future of technology – we're actively shaping it. Our goal is to continue pushing the boundaries of contextual intelligence, creating more intuitive and powerful experiences for users worldwide.

Elliptic Labs is headquartered in Norway with presence in the USA, China, South-Korea, Taiwan, and Japan. The company is listed on the Oslo Stock Exchange. Its technology and IP are developed in Norway and are solely owned by the company.

Trademark

INNER BEAUTY is a registered trademark of Elliptic Labs.

AI Virtual Smart Sensor, AI Virtual Smart Sensor Platform, AI Virtual Proximity Sensor, AI Virtual Presence Sensor, AI Virtual Connection Sensor, AI Virtual Gesture Sensor, AI Virtual Heartbeat Sensor, and AI Virtual Breathing Sensor are trademarks of Elliptic Labs.
