

## Knowit continues as a long-term partner to the Digital and Population Data Services Agency in Finland

**Knowit has been selected by the Digital and Population Data Services Agency (DVV) for a new framework agreement covering two key service areas. The new contract period spans five years, with a total estimated value of approximately EUR 250 million, shared with a few other partners.**

Knowit submitted bids for three out of five service areas and was selected for the two largest. A procurement decision is still pending for the third area Knowit applied for.

The selected areas, their estimated values, and the number of suppliers involved are as follows:

- EUR 108 million, with six other suppliers participating – Knowit ranked 6th
- EUR 80 million, with five other suppliers – Knowit ranked 3rd

The framework agreement concerns the provision of IT expert services to support DVV's operations. The services include the design, development, implementation, further development, maintenance, and quality and information security assurance of various information systems, applications, or similar solutions. The services may involve both fixed-scope projects and ongoing service needs.

Knowit has been a long-term partner to DVV since 2014, participating in nearly all major digital service projects. The company has been especially involved in developing Suomi.fi e-Identification and Authorisation Services, which play a critical role in digital public services across Finland. Over the past decade, dozens of Knowit experts have contributed to DVV's development initiatives. The new contract is an important continuation of a long-standing collaboration to advance digitalisation in the public sector.

"I want to warmly thank DVV for the trust and meaningful cooperation. It has been a privilege for us to help develop solutions like Suomi.fi, which have a tangible impact on citizens and society at large. This new framework agreement allows us to continue that important collaboration, and we are very excited about it. A special thank-you also goes to our experts, who do impactful work with DVV every day," says Terhi Sirviö, VP Public Sector, Knowit Solutions Oy.

The framework agreement does not include a purchase obligation, and actual assignments will be based on contracts specific to each service area. Knowit received notification of the procurement decisions on June 11, 2025, and the contracts will come into effect after the appeal period ends in accordance with Finnish procurement law.

## **About Knowit**

Knowit are digitalization consultants with a vision to create a sustainable and humane society through digitalization and innovation. Knowit supports its clients in the digital transformation and stands out among other consultancy firms through its decentralized organization and agile work methods in client assignments. The operations are divided into four business areas – Solutions, Experience, Connectivity, and Insight – which offer services in bespoke system development, digital customer experiences, the internet of things, cloud, cybersecurity, and management consultancy. Competences from several business areas are often combined in client projects. Knowit was founded in 1990 and now has around 3,900 employees, mainly in the Nordic countries, but also in operations in Germany and Poland.

Knowit AB (publ) has been listed on the stock market since 1997 and is currently listed on Nasdaq OMX Stockholm Mid Cap. For more information about Knowit, please visit [knowit.eu](https://knowit.eu).
