
New AroCell Patent granted by U.S. Patent and Trademark Office

AroCell announced today that the patent no. 15/357 762 and titled "Method for use of antibody-based test for the prediction of cancer relapse - all immunoassays against TK1 " is granted by United States Patent and Trademark Office.

The patent describes the use of TK1 antibody-based test for prediction of early cancer progression and the likelihood of tumor recurrence. It is estimated based on the binding response of TK1 in clinical samples to antibodies.

"We are delighted that the U.S. Patent and Trademark Office has granted this patent. This reinforces our patent position in the U.S. and increases AroCell's attractiveness as a business partner. We will continue to develop our portfolio of proprietary assets to further expand its business opportunities." Says Michael Brobjer, CEO AroCell.

About AroCell

AroCell AB (AROC) is a Swedish company that develops standardized modern blood tests to support the prognosis and follow up of cancer patients. AroCell's new technology is based on patented methods to measure Thymidine Kinase 1 (TK1) protein concentrations in a blood sample. The TK 210 ELISA test provides valuable information mainly about the condition of cancer patients. This may help clinicians to optimize treatment strategies and estimate the risk of recurrence of tumor disease during the monitoring of the disease. AroCell (AROC) is listed at Nasdaq First North with Redeye AB as Certified Adviser: Certifiedadviser@redeye.se, +46 (0)8 121 576 90. For more information; www.arocell.com

This information is information that AroCell is obliged to make public pursuant to the EU Market Abuse Regulation. The information was submitted for publication, through the agency of the contact persons set out above, at 2019-11-18 16:43 CET.
