

## EUROBATTERY MINERALS SENDS TUNGSTEN ORE FROM THE SAN JUAN MINE FOR METALLURGICAL TESTWORK

**Stockholm, 1 September 2025 – The mining company Eurobattery Minerals AB (Nordic Growth Market: “BAT” and Börse Stuttgart: “EBM”; in short: “Eurobattery Minerals” or the “Company”) announces that it will ship the first bulk sample of material this week from its San Juan tungsten project in Galicia, Spain, to the laboratories of Advanced Mineral Processing S.L. (“AMP”) in Madrid for comprehensive analysis and metallurgical testwork.**

The material with the wolfram ore will be shipped to a test facility in Madrid and will now undergo a series of testwork including classification, crushing, and grinding, followed by a battery of further metallurgical tests, among them shaking table tests, over a four-week period.

*“Things are advancing fast at our wolfram project in Galicia,” said Roberto García Martínez, CEO of Eurobattery Minerals. He continued: “The collaboration with AMP ensures that we will have access to state-of-the-art processing solutions tailored to our specific ore and operational conditions.”*

The test results will form the basis for AMP’s design of a customised, turnkey pilot processing plant for the San Juan project. AMP is expected to deliver its pilot plant proposal in Q4-2025, with a final investment decision anticipated in before the end of the year. The turnkey delivery of the pilot plant is scheduled for Q3-2026.

*“Sending this material for final testing is not just a technical step – it is part of our broader commitment to responsible project development. Working with AMP allows us to design a pilot plant that is not only efficient but also tailored to minimise environmental impact, in line with our vision for a modern, responsible mining operation in Galicia,” said Agne Ahlenius, Managing Director of Tungsten San Juan.*

### **About Advanced Mineral Processing (AMP)**

Advanced Mineral Processing S.L. (AMP) is a Spanish engineering company specialising in process engineering, plant design, and system development for the treatment of mineral ores, industrial minerals, aggregates, and raw materials for various sectors, including metallic mining and recycling. AMP is internationally recognised for its efficient and innovative engineering solutions, with decades of experience in projects across the globe.

**About Eurobattery Minerals**

Eurobattery Minerals AB is a Swedish mining company listed on Swedish Nordic Growth Market (BAT) and German Börse Stuttgart (EBM). With the vision to make Europe self-sufficient in responsibly mined minerals, the Company's focus is to realize numerous mining projects in Europe to supply critical raw materials and, by doing so, power a cleaner and more just world.
