### Balanced Exposure

Exposure by credit type for Balanced as of 2026-05-31.

### About Balanced

The Balanced strategy is suitable for investors seeking stable returns and high liquidity. With Balanced, your capital is invested across a large number of loans with low risk of credit losses and strong cash flow. Interest payments are typically distributed monthly or quarterly.

The strategy is also suitable for investors who wish to maintain the option of withdrawing funds when needed. Following each twelve-month period, you may sell investments of up to SEK 100,000 free of charge. Any unused withdrawal allowance accumulates over time.
