Resolution authorizing the Board of Directors to determine new share issues (item 13)

The Board of Directors proposes that the Annual General Meeting authorizes the Board of Directors, for the period until the next Annual General Meeting, to determine new issues of shares, on one or more occasions and with or without deviating from the preferential rights of existing shareholders. It shall be possible to implement such share issues as cash issues, issues-in-kind, or set-off issues.

The authorization may be utilized to issue shares corresponding in total to at most 10 percent of the share capital registered in the Company at the time at which the decision is made to implement the issue. The issue price shall be determined on market terms.

Deviations from the preferential rights of existing shareholders shall only be possible in connection with acquisitions of all or parts of companies or operations, or for the Company's continued expansion. If the Board of Directors decides to issue shares deviating from the preferential rights of existing shareholders, this shall be because the Board needs to be able to access capital quickly or may need to make payment by means of shares in the Company through an issue-in-kind or set-off issue or to raise capital for the Company's continued expansion efficiently and inexpensively.

The Board of Directors proposes that the Annual General Meeting resolves to authorize the Board, for the period until the next Annual General Meeting, to decide, on one or more occasions, to repurchase shares such that the Company does not hold more than 10 percent of the total number of shares in the Company, on the condition that such acquisitions are approved by the Swedish Financial Supervisory Authority. Repurchases may only be made via the Nasdaq First North Growth Market, either at a price within the current price range, that is, the interval between the highest purchase price and the lowest selling price or, in the case of repurchases

conducted by brokerage firms on the Company's behalf, the price of the shares may correspond to the volume-weighted average price during the period in which the shares were repurchased, even if the volume-weighted average price is outside the price range on the date on which the shares are transferred to the Company. The shares must be paid for in cash.

The purpose of the proposed authorization to repurchase shares is to enable the Board to adapt the Company's capital structure to its capital requirements.

The Board of Directors, or the individual it appoints, shall otherwise be entitled to amend the above decision as may prove necessary in connection with its registration and otherwise take the measures necessary to implement the decision.
