SinterCast appoints new Operations Director

[Stockholm, 20 September 2023] – SinterCast is pleased to announce the recruitment of Dr Vítor Anjos, who will join the company on 1 January 2024 in the capacity of Operations Director. His appointment strengthens the executive management team and establishes an in-house path for the eventual succession of the current President & CEO, Dr Steve Dawson.

Dr Anjos, a Portuguese citizen born in 1982, comes to SinterCast as a specialist in the company’s core technical field of cast iron process control. Most recently, he has served as Chief Operations Officer at the AAPICO Águeda iron foundry in Portugal where he has been responsible for production and quality, and actively involved in new business development. Concurrently, he serves as General Manager of the Centre for Innovation and Technology N Mahalingham (CITNM) in Portugal, focussing on innovation and technology transfer to the automotive and foundry industries. With considerable international experience in the foundry and automotive industries, Dr Anjos will initially focus on ongoing technical projects, operations and investor and sustainability messaging. Having obtained his PhD in cast iron solidification and thermal analysis at the University of Duisburg-Essen in Germany, Dr Anjos is fluent in German, Portuguese, Spanish and English.

I have been an admirer of SinterCast and its leadership role in the development, promotion and application of Compacted Graphite Iron (CGI) since I first entered the foundry industry in 2007. It is an honour for me to now join the company and to participate in the continued growth of the business and the development of new applications and new customers” said Dr Vítor Anjos. “I am a strong believer in the long-term future of the internal combustion engine and I am proud of the role that CGI and the foundry industry can play in improving fuel efficiency and reducing carbon emissions. I look forward to joining SinterCast in the new year and working together with Steve and the team – and the customers – to build upon the well-established SinterCast track record.”

“Vítor knows SinterCast. He knows our technology, he knows our industry, and he knows our foundry and our OEM customers. He also knows many of our team members, having worked together with SinterCast on research projects at CITNM. As a technology and innovation enthusiast, I am confident that he will be an excellent addition to our team” said Dr Steve Dawson, President & CEO of SinterCast. “I am pleased to introduce Vítor and to welcome him to our executive management team. I look forward to working closely together with him and to sharing my twenty years of experience as CEO. We have a great technology, a great team and a great future. I am happy that Vítor will be an important part of that future.”
