

Danish company Value Engineering becomes part of XPartners

XPartners is expanding its Danish platform within structural engineering advisory and welcomes Value Engineering ApS to the group. With optimisation of load-bearing structures as its specialty, Value Engineering brings proven expertise in reducing material use, costs and carbon footprint in building projects, without compromising safety, functionality or buildability.

Value Engineering was founded in 2020 and is headquartered in Silkeborg. The company comprises a specialised team of structural engineers, including certified structural engineers, lecturers at Aarhus University, and PhD-level specialists. The firm advises developers, contractors and consulting engineers throughout the building process, delivering design reviews, technical client advisory, certified structural support (KK2–KK4 and third-party control), and specialised structural consultancy. Its work spans from early design phases to detailed engineering and statutory documentation. In 2024, the company generated just over DKK 10 million in revenue.

“Value Engineering has built a strong position as a technical specialist in structures for complex projects, including industrial, pharmaceutical and data centre facilities. Their high professional standards and practical approach fit XPartners well, and this addition strengthens our Danish platform,” says **Rasmus Ødum**, Managing Director of XPartners Denmark.

Value Engineering's clients span construction and industry, where demand for more resource-efficient and sustainable structural solutions continues to grow.

“Becoming part of XPartners allows us to further develop our specialist capabilities in collaboration with other strong expert environments. At the same time, we can retain our identity and way of working. This provides a solid foundation for creating even more value for our clients and is a natural next step in the company's development,” says **Mads Trosborg Møller**, Managing Director of Value Engineering.

About Value Engineering

Value Engineering ApS was founded in 2020 and is a specialised structural engineering consultancy based in Silkeborg. The company provides services in design review, technical client advisory, certified structural engineer support (KK2–KK4) and third-party control, as well as specialised structural consultancy.

About XPartners

XPartners Group AB (publ) is a Nordic consulting group within engineering and design. The group brings together more than 1,800 specialists who advise clients in infrastructure, buildings, energy, and the environment. It consists of approximately 60 entrepreneur-led companies supported by a shared platform for collaboration and growth. On a pro forma basis, annual revenue is above SEK 3.5 billion and the company is primarily owned by its employees, with backing from the private equity firm Axcel. www.XPartnersGroup.com
