

Maven Wireless receives follow-up orders from Dutch MNO worth circa 10 MSEK

One of the biggest mobile network operators (MNO) in Holland will use Maven Wireless high power digital DAS to build mobile phone coverage in both tunnel and in-door projects in the Netherlands. Both projects will be shipped and invoiced during first half of 2024.

Maven Wireless digital DAS was selected by the customer primarily based on its sustainable DAS product with the lowest CO2 emissions on the market. The simple interface with one layer for all technologies making upgrades for 5G very simple was also a key factor in the selection process together with the success factors with implementing the same Maven DAS in an in-door project last year.

"I am very happy receive the trust and additional strategic business with one of the key mobile operators in the world. This is again a confirmation of us having the best digital DAS products in the world with support for 5G and future technologies "says Fredrik Ekström CEO of Maven Wireless.
