Bellman Group secures SEK 190 million order for the establishment of a new regiment in Kristinehamn

Bellman Group's subsidiary VSM has been awarded an order to carry out site preparation work for the establishment of the new A9 artillery regiment in Kristinehamn. The order is valued at approximately SEK 190 million. Uppländska Berg will participate as a subcontractor to VSM.

The assignment forms part of the project for the new Bergslagen Artillery Regiment, A9, for which NCC and the Swedish Fortifications Agency have initiated a collaboration on design and construction. The regiment will be established at Harberget in eastern Kristinehamn as part of the efforts to strengthen Sweden's defence capabilities.

VSM is responsible for the site preparation work within the scope of its assignment, with Uppländska Berg as a subcontractor.

"We are proud to have been entrusted with contributing to the establishment of the new regiment. Our focus is on delivering high-quality site preparation work in close coordination with the other parties involved in the project. Together with Uppländska Berg, we look forward to contributing our expertise and experience," says Marcus Nilsson, CEO of VSM.

The assignment is an excellent example of how Bellman Group's companies collaborate and contribute complementary expertise to major building and civil engineering projects.

"This is a significant assignment for VSM and Bellman Group. Through the collaboration between VSM and Uppländska Berg, we bring together expertise from two of the Group's companies to meet the project's needs. We are proud to contribute to the development of critical infrastructure and Sweden's defence capabilities," says Magnus Persson, CEO of Bellman Group.
