

H100 Group Partners with STOKR to explore a tokenized convertible loan

H100 Group AB (publ) (“H100” or the “Company”) has today entered a strategic partnership with STOKR S.A. (“STOKR”), a Luxembourg-based platform for tokenized digital assets. Through this collaboration, H100 and STOKR will explore the implementation of a tokenized convertible bond structure aimed at engaging the Bitcoin ecosystem and enabling new avenues for long-term financing.

As part of the agreement, STOKR will support the development of a compliant tokenization framework tailored to H100's vision. The structure will be designed to appeal to the global Bitcoin community and may serve as a blueprint for future capital raises by H100.

“Partnering with STOKR accelerates our Bitcoin Treasury Strategy by allowing us to directly engage the Bitcoin-native investor community through a tokenized financing structure. STOKR brings world-class expertise in digital securities and blockchain infrastructure, and we are excited to leverage that competence as we help shape how public companies can raise and manage capital in a decentralized world”, said Sander Andersen, CEO of H100 Group.

STOKR brings deep experience in providing cutting-edge technology for tokenized securities within Europe's established MiFID II framework and will work closely with H100 to ensure the solution meets applicable legal, technical, and investor standards.

About STOKR

STOKR is at the forefront of transforming capital markets for the digital era. As a leading digital investment platform, STOKR helps asset managers, fund managers, and issuers to tokenize and manage a diverse range of financial assets. STOKR operates across two core business lines: a full-service, end-to-end tokenization solution for issuers seeking comprehensive support in structuring, launching, and managing full life-cycle of tokenized securities; and an API-first solution (Tokenization-as-a-Service, or TaaS) designed for financial institutions and regulated issuers looking to integrate tokenization directly into their own systems.

In 2025, STOKR surpassed \$1 billion in total tokenized asset volume, reinforcing its leadership in the real-world asset (RWA) space and its pivotal role in reinforcing Bitcoin's role as the foundation for modern financial infrastructure.

With over six years of experience in the tokenization space, STOKR merges cutting-edge technology with regulatory robustness to support the institutional shift toward digital assets. As a Virtual Assets Service Provider (VASP) registered with the CSSF in Luxembourg, STOKR is committed to the highest standards of regulatory compliance, ensuring a reliable and trustworthy platform for all stakeholders.
